

## CURRICULUM COMMITTEE AGENDA FOR NOVEMBER MEETING

November 17, 2008

1. Revisit CCR #04/08-6 GMA 405 International Maritime Organizations

This course was included in a package of GSMA changes last April as only a renaming of an existing course but it also has a new course description for the catalog and probably other new information. This course has been taught several times but it never was brought to the Curriculum Committee as a new course. Since this course doesn't show up on the GSMA curriculum sheet, it fell through the crack and never got officially approved, though it was attached to the GSMA curriculum revision passed last year.

2. Policy/Procedure. Report from subcommittee on these points:

reconcile with senate and president's changes,  
get Paul Jackson into policy,  
advise us on how to get IMAP related activities oversight into our working methods.

3. ME Program Review. Brief report from subcommittee on progress and issues

4. University-wide Learning Outcomes. Brief report from subcommittee on status.
